#### Notes:

a Jacobs Engineering Group, Inc., Final Baseline Human Health and Screening Ecological Risk Assessment for the Group 4 Sites, Sites 04, 08,

35A, 35B, 35C, 46, 47, 48, 50, 60, 67, Goose Prairie Creek, Saunder's Branch, and Caddo Lake, Volume 1, Longhorn Army Ammunition Plant,

Kamack, Texas, Oak Ridge, Tennessee, June 2003.

b Table 3-43 of Jacobs (2003) risk assessment.

c ILCR calculated for exposures to the metal in soil by all pathways evaluated, Table C-107 of Jacobs (2003) risk assessment.

d ILCR calcutated for exposures to all chemicals in soil by all pathways evaluated, Table C-107 of Jacobs (2003) risk assessment.

e Value based on samples collected since 2003, Table 4-61

f Value based on samples collected since 2003 (Table 4-65).

g Value equals sum of Jacobs (2003) value and result of calculations summarized in Table 4-65.

h HI calculated for exposures to the metal in soil by all pathways evaluated, Table C-104 of Jacobs (2003) risk assessment.

i HI calculated for exposures to all chemicals in soil by all pathways evaluated, Table C-104 of Jacobs (2003) risk assessment.

i Values for aluminum and vanadium Post-2003 HI = Jacobs HI x (Post-2003 EPC/Jacobs-2003 EPC).

k Net increase in HI for aluminum and vanadium = Post-2003 HI - Jacobs-2003 HI. Calculated value for arsenic is shown in Table 4-65.

I Revised HI = Jacobs-2003 Total HI + Sum of Net Increases in HI associated with aluminum, arsenic, and vanadium

NA - not applicable

NC - not calculated, Post 2003 EPC is less than Jacobs (2003) EPC.

NE - not evaluated, chemical was not evaluated in Jacobs (2003) risk assessment

#### Notes:

a Jacobs Engineering Group, Inc., Final Baseline Human Health and Screening Ecological Risk Assessment for the Group 4 Sites, Sites 04, 08,

35A, 35B, 35C, 46, 47, 48, 50, 60, 67, Goose Prairie Creek, Saunder's Branch, and Caddo Lakelolume 1, Longhorn Army Ammunition Plant,

Karnack, Texas, Oak Ridge, Tennessee, June 2003.

b Table 3-44 of Jacobs (2003) risk assessment.

c ILCR calculated for exposures to the metal in soil by all pathways evaluated, Table C-125 of Jacobs (2003) risk assessment.

d ILCR calculated for exposures to all chemicals in soil by all pathways evaluated, Table C-125 of Jacobs (2003) risk assessment.

e Value based on samples collected since 2003, Table 4-114

f HI calculated for exposures to the metal in soil by all pathways evaluated, Table C-122 of Jacobs (2003) risk assessment.

g Hi calculated for exposures to all chemicals in soil by all pathways evaluated, Table C-122 of Jacobs (2003) risk assessment.

h Values for aluminum Post-2003 HI = Jacobs HI x (Post-2003 EPC/Jacobs-2003 EPC).

i Net increase in HI for aluminum = Post-2003 HI - Jacobs-2003 HI.

k Revised Hi = Jacobs-2003 Total HI + Sum of Net Increase in HI associated with aluminum.

NA - not applicable

NC - not calculated, Post 2003 EPC is less than or equal to Jacobs (2003) EPC.

Shaw Environmental, Inc.

### <u>Notes:</u>

\* Jacobs Engineering Group, Inc., Final Baseline Human Health and Screening Ecological Risk Assessment, Group 2 Sites, Sites 12,17,

18/24, 29, 32, 49, Harrison Bayou and Caddo Lake/Volume 1, Longhorn Army Ammunition Plant,

Karnack, Texas, Oak Ridge, Tennessee, August, 2002.

<sup>b</sup> Chemical was not identified as a chemical of potential concern (COPC) in Table 3-65 of the Jacobs (2002) risk assessment

<sup>6</sup> ILCR calculated for exposures to all chemicals in soil by all pathways evaluated for exposure point concentration (EPC)

including samples within the 5,000 foot trench, Table C-41 of Jacobs (2002) risk assessment.

\* Maximum concentration of samples collected since 2003 with concentration exceeding RBSV, Table 4-123

<sup>1</sup> Value calculated for exposures to the chemical in soil by all pathways evaluated, Table 4-134a.

<sup>9</sup> Value equals sum of Jacobs (2002) value and result of calculations summarized in Table 4-134a.

\* HI calculated for exposures to all chemicals in soit by all pathways evaluated for exposure point concentration (EPC)

including samples within the 5,000 foot trench, Table C-38 of Jacobs (2002) risk assessment.

Value calculated for exposures to the chemical in soll by all pathways evaluated, Table 4-134b.

<sup>3</sup> Value equals sum of Jacobs (2002) value and result of calculations summarized in Table 4-134b.

NA - not applicable
