### FINAL DATA EVALUATION REPORT CHEMICAL CONCENTRATIONS IN SOIL SAMPLES ASSOCIATED WITH LHAAP-35/36 SUMPS LONGHORN ARMY AMMUNITION PLANT KARNACK, TEXAS

### **VOLUME III OF III: TABLES FOR SECTION 4.0 AND APPENDIX A**

Prepared for U.S. Army Corps of Engineers Tulsa District 1645 South 101st East Avenue Tulsa, Oklahoma

Prepared by Shaw Environmental, Inc. 3010 Briarpark, Suite 400 Houston, Texas 77042

Contract No. W12QR-04-D-0027, Task Order No. DS02 Shaw Project No. 117591

January 2008

### **Master Footnote and Abbreviation List**

- <sup>a</sup> Value provided by the Texas Commission on Environmental Quality (TCEQ) as updated through March 2006 available on the TCEQ website at <a href="http://www.tceq.state.tx.us/assets/public/remediation/rrr/msc-rbscn\_2006.xls">http://www.tceq.state.tx.us/assets/public/remediation/rrr/msc-rbscn\_2006.xls</a>.
- 1,2-Dichloroethene = Value shown is lower of the cis- or trans-1,2-dichloroethene values.

95% UPL = Upper Prediction Limit of background concentration

Background Concentrations = Lower of surface and subsurface soil background concentrations used in these comparisons.

### Boxed and bold = Concentration exceeds Applicable RBSV

Carbon Range C12-C28 = Value shown is the lowest of >12-16C, >16-21 C, and >21-35 C (aromatic) boiling fraction of total petroleum hydrocarbons RBSVs given in TCEQ March 2006 guidance.

Carbon Range C12-C28 = Value shown is the RBSV for the >8C-10C (aromatic) boiling fraction of total petroleum hydrocarbons given in TCEQ March 2006 guidance. m- or p- xylene = Value shown is the lower of m-, or p-xylene values given in TCEQ March 2006 guidance.

Shading indicates value equal to MDL modified by dilution and percent solids factors for chemicals that are undetected and have an applicable RBSV equal to the MQL. Weight of Evidence = EPA designator indicating that chemical is a known human carcinogen (A) or not a human carcinogen (D).

- D Analyte was quantified as a secondary dilution factor
- DIL dilution factor
- FD Field duplicate sample
- Ft feet
- H Estimate is high
- J Estimated value. Chemical was detected above the method detection limit but below the MQL.
- L Estimate is low
- LQ laboratory qualifier
- MDL Method Detection Limit
- MQL Method Quantitation Limit
- mg/kg milligrams per kilogram
- mg/I milligrams per liter
- NA Not applicable
- NE Value not established.
- RBSV risk based screening value
- REG Regular sample
- U Compound validated as not detected above MQL shown
- VQ data validator qualifier
